

Profile

Offshore Oil & Gas

To meet the global demand for energy

Shallow water pipelay barge Stingray in Taiwan

Leading global offshore contractor

Van Oord operates worldwide in more than fifty countries as a leading contractor for dredging, marine engineering and offshore energy projects (oil, gas and wind), offering innovative solutions to marine challenges.

We are a family-owned business with long history of maritime achievements, offering marine solutions of value, both now and in the future. Safety, sustainability and ingenuity go hand-in-hand. Van Oord takes an interest in its value chain, which extends from clients to suppliers.

‘Bright ideas begin early at Van Oord. We’re driven long-term problem solvers.’

Joep Athmer, Managing Director Offshore, at the introduction of the new Subsea Rock Installation vessel Bravenes

Executing a pipe pull to connect the subsea gas infrastructure to the mainland near Darwin, Australia

Marine ingenuity

Our Marine ingenuity is the foundation of our success. Van Oord's dedicated international engineering department focuses on your project right from the FEED (Front End Engineering Design) stage until project completion. In our clear communication, we reduce interface management where possible. Van Oord's pro-active approach means fewer risks. Projects are completed on time and within budget.

We carry out projects relating to:

- Offshore Pipeline Installation (OPI)
- Subsea Rock Installation (SRI)
- Offshore Installation (Gravity Based Structures) and SPM (Single Point Mooring) Installations

EPC services

Van Oord Offshore has become one of the most specialised Engineering, Procurement and Construction (EPC) contractors in the world.

Our fully integrated EPC services include:

- detailed project design and verification
- procurement of materials and associated services
- installation and commissioning services

Our one-shop-stop approach allows us to offer EPC services to the oil & gas industry. We prepare and execute complete projects in shallow and deep waters.

Towing and installing the Arkutun Dagi Gravity Based Structure in Russia

Subsea Rock Installation

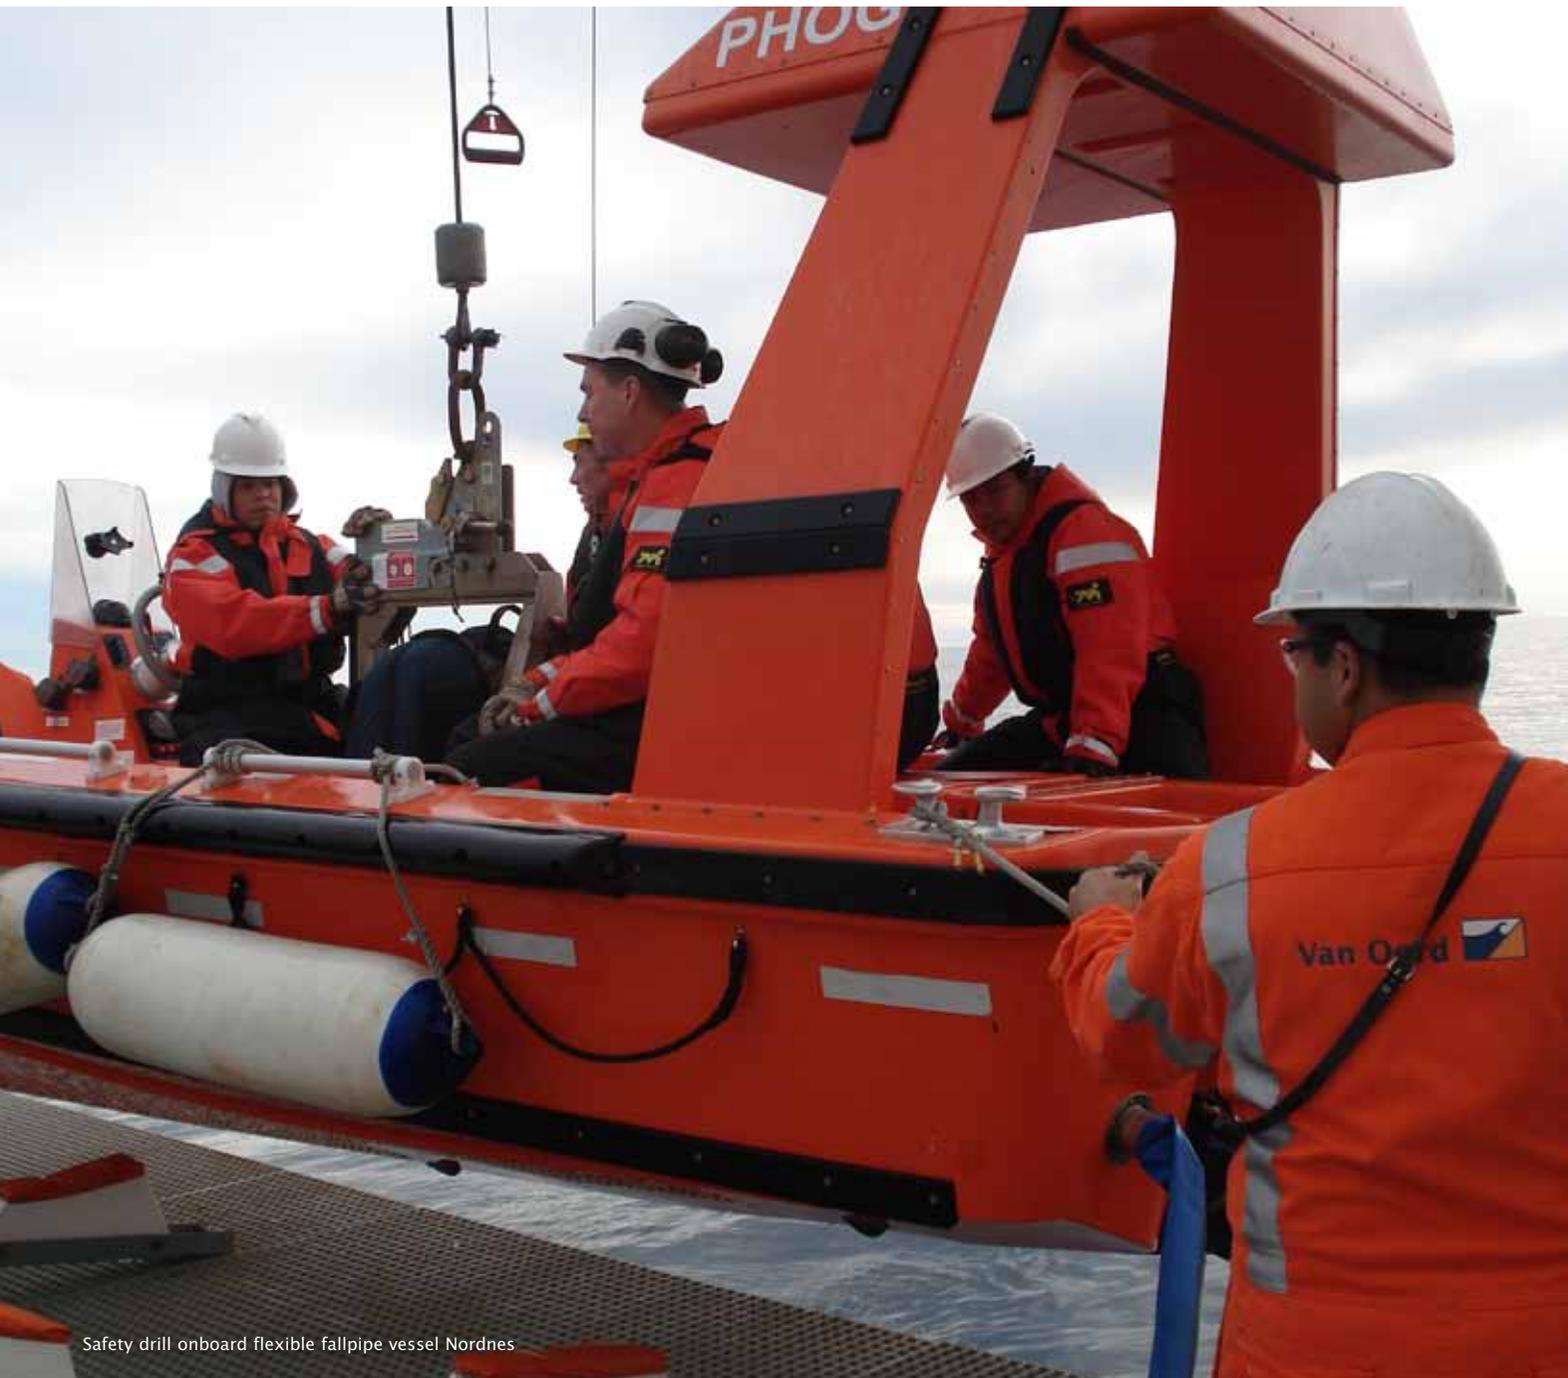

A pioneer mindset

We have a deep-rooted passion for water and technology and a focus on performance and production. We specialise in projects requiring a pioneer mindset, vision, impassioned commitment and innovative solutions. You can count on our hard-working, skilled and resourceful staff to do the job well, safely and on time. Van Oord's state-of-the-art equipment can handle the most complicated and challenging offshore oil and gas projects. We continuously modernise our fleet, equipment and technology to meet your needs. Our safe and fit-for-purpose vessels are deployed around the world, including the most harsh and remote environments.

Subsea Rock Installation vessel Bravenes will be operational in 2016

Work safe

Safety is the core value of Van Oord. Our approach is bottom up and hands on. We stimulate our employees to take charge of their own safety and that of others. Safety is always at the heart of everything we do, no matter where our work takes us. Safeguarding life is our licence to operate on the global market. We offer clients dedicated safety sessions to inform them about our stringent QHSE (Quality, Health, Safety and Environment) rules.

‘The key to safety is teaching others how to be a leader.’

Pieter van Oord, CEO Van Oord, at the kick-off of the Safety Leadership Programme

Sustainability

Our work will impact society and environment. Van Oord aims to proactively identify possible effects. We plan and execute the works in such a way that any adverse consequences are avoided or minimised and controlled. Cost-effective and sustainable solutions will be sought to resolve these issues.

Care for others and our planet is key in everything we do. We consider family values and long-term business relationships important. We take good care of our employees, clients and shareholders, and invest in local communities and charities.
